                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                FUNCTION: THIS PROTEIN MAY BE PART OF A GLYCOGEN BIOSYNTHETIC/
CATABOLIC OPERON BUT IS NOT REQUIRED FOR GLYCOGEN SYNTHESIS.
SIMILARITY: BELONGS TO FAMILY 13 OF GLYCOSYL HYDROLASES, ALSO
KNOWN AS THE ALPHA-AMYLASE FAMILY.
CAUTION: REF.2 SEQUENCE DIFFERS FROM THAT SHOWN DUE TO A STOP
CODON IN POSITION 507.

"Cloning and sequence analysis of the cyclomaltodextrinase gene
Bacillus sphaericus and expression in Escherichia coli cells.";
Appl. Microbiol. Biotechnol. 39:197-203(1993).

-i- FUNCTION: HYDROLYZES CYCLODEXTRINS. CAN ALSO ACT ON LINEAR
MALTODEXTRINS, MITH THE EXCEPTION OF MALTOSE. THE PH OPTIMUM
PH 8.0 AND THE OPTIMAL TEMPERATURE IS 45 DECREES C.

-i- CATALTIC ACTIVITY: CYCLOMALTODEXTRIN + H(2)0 - LINEAR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         BACSH
